

Mark Sullivan
President and CEO, Secured Cyber LLC.

Secure Global Collaboration.

Security Controls and Risk Management.

The National Institute of Standards and Technology (NIST) will soon issue its fourth revision of SP 800-53, Recommended Security Controls for Federal Information Systems and Organizations, that's expected to include 23 privacy controls. To some, the security controls and corresponding risk management (see SP 800-37) can be daunting. Not here at Secured Cyber. Our professionals have made their careers around the certification and accreditation processes as well as putting together risk management plans that are achievable.

Secured Cyber is an Information Technology company that provides specialized professional services and innovative solutions in the areas of Information Assurance and Cyber Security. Secured Cyber has experience in supporting defense, intelligence, homeland security, and federal civilian clients. While our people have backgrounds in all aspects of Information Technology, we have opted to focus purely on Cyber Security consulting and solutions. In doing so, we believe that we can not only stay current on the continuous, and ever-growing cyber threat, but also stay one step ahead. We are a CVE Certified Service-Disabled Veteran-Owned Small Business (SDVOSB) that is committed to the highest standards of quality, trustworthiness, and value. We thrive on challenges and the opportunity to compliment our customers' mission, wherever they are located around the world.

“ To keep pace with the growing threat brought about by an increasing number of cyber attacks against federal information systems, NIST is committed to producing a comprehensive catalog of cutting-edge safeguards and countermeasures that are necessary to help protect the core missions and business functions of the federal government.

-Ron Ross

Joint Task Force Leader and NIST Fellow
